

Mohamed Ahmed

Full-Stack Developer & Smart Systems Engineer

Email: momammedahmed1m@gmail.com | Phone: 01013374680LinkedIn: linkedin.com/in/mohammed-ahmed-dev

Professional Summary

I combine my passion for software engineering, mobile and web development, with my expertise in Artificial Intelligence (Deep Learning) and Embedded Systems. I aim to build robust software architectures and integrated systems that are scalable and smartly meet user needs.

Technical Skills

Software & UI: React Native, JavaScript, HTML, Java, Full-Stack Development, Software Architecture
AI/ML: Deep Learning, VGG16 & VGG19, AlexNet, Data Preprocessing, AI Agents
Embedded Systems: Microcontrollers, ATmega32 (Timer1), ESP32, Sensors Integration, Microchip Studio
Databases & Tools: Supabase, Git & GitHub, CI/CD Pipelines, CodeRabbit, Figma, Scrum/Agile

Featured Projects

TourBuddy Platform

Role: Developer & Technical Planner | Tech: React Native, Figma, Architecture

Physio Clinic Management System

Role: Full Stack Developer | Tech: React, Supabase, Cloud Databases

AI Agent

Role: AI Developer & Team Member | Tech: Python, Machine Learning, Agile (Scrum)

Task Management System

Role: Software Developer | Tech: JavaScript, HTML, Java, Database

Activities & Experience

Tech Speaker (Ongoing)

Delivering advanced technical presentations on Agile (Scrum) and CMMI.

Participant in GDG Hackathon (April 2026)

4-day hackathon, workshops on AI tools and version control systems.

Hack to Hire GenAI Hackathon (October 2025)

Developed innovative software solutions based on generative AI in Cairo.

Certifications

- AI Engineering Bootcamp (January 2026)
- Arabic Agentic AI (September 2025)
- AI for Startups (September 2025)
