

MOHAMED AHMED

REACT NATIVE MOBILE DEVELOPER

■ Luxor, Egypt | ✉️ mohammedahmed21ali@gmail.com | 📞 +20 1013374680
■ GitHub: github.com/Mohammed0Ahmed0Mohammed | 📱 WhatsApp & Telegram: +201013374680

PROFESSIONAL SUMMARY

Accomplished Computer Science & Engineering student and specialized React Native Mobile Developer based in Luxor, Egypt. Demonstrated expertise in architecting and delivering high-performance, cross-platform mobile applications for iOS and Android. Adept at transforming complex business requirements into clean, maintainable mobile architecture utilizing modern state management, RESTful API integration, JWT authentication, cloud synchronization, and responsive UI design principles.

TECHNICAL CORE COMPETENCIES

Mobile & UI Development:	React Native, Mobile Architecture, Cross-Platform UI, Component Lifecycle, AsyncStorage
Programming Languages:	JavaScript (ES6+), Java, C / C++, Python, HTML5, CSS3
CS & Architecture:	OOP, Data Structures & Algorithms, Clean Architecture, Design Patterns
Backend Integration & Cloud:	REST APIs, JWT Auth, Supabase Client, Firebase, Real-Time Data Sync
AI / ML & Tools:	Deep Learning, VGG16/19, Git & GitHub, CI/CD, Figma, Scrum / Agile

FEATURED MOBILE PROJECTS & ARCHITECTURE

SmartWholesale Network (SWN)

Graduation Project — Lead Mobile Developer

Tech Stack: React Native, REST APIs, JWT Auth, State Management, Mobile Architecture

- Architected and developed cross-platform React Native mobile applications connecting suppliers, wholesalers, and retailers in a unified ecosystem.
- Integrated subscription management workflows and authentication mechanisms ensuring seamless mobile access across all user tiers.
- Consumed automated data transfer REST APIs to dynamically sync supplier product catalogs directly to wholesale storefronts.
- Implemented client-side anti-monopoly validation logic and instant notification alerts to enforce order caps on mobile orders.
- Engineered responsive, high-performance mobile UI components with smooth navigation and offline data handling.

TourBuddy Platform

Mobile Developer & Technical Planner

Tech Stack: React Native, Mobile Architecture, UI/UX, Figma, Firebase, REST APIs

- Built a specialized mobile marketplace connecting international and local tourists with certified tour guides across Egypt.
- Integrated real-time location services, interactive tour booking schedules, and mobile payment processing APIs.
- Crafted custom responsive mobile components prototyped in Figma for optimal performance on iOS and Android.

Physio Clinic Management System

Mobile Developer

Tech Stack: React Native, Supabase Client, REST APIs, Tailwind CSS

- Engineered a cross-platform mobile application for physical therapy clinics and healthcare practitioners.
- Implemented Electronic Medical Records (EMR) tracking, treatment session logs, and automated appointment scheduling.
- Leveraged Supabase client hooks for real-time data synchronization, role-based mobile access control, and encrypted file viewing.

Task Management System

React Native Mobile Developer

Tech Stack: React Native, JavaScript, AsyncStorage, REST APIs

- Designed an intuitive mobile productivity app featuring dynamic project categorization, priority tagging, and workflow boards.
- Implemented local offline caching using AsyncStorage with automated cloud synchronization via REST APIs upon reconnection.

EDUCATION & ACADEMIC BACKGROUND

Bachelor of Computer Science & Engineering

Luxor, Egypt

Specialization in Mobile Application Development, Software Engineering Architecture, and Computer Science Fundamentals.
